MULTI-FAMILY HOUSING

Prescribed for Progress™

Easy to Use

SCIFIT equipment is easy to use and features simple, familiar movements – walking pedaling, pushing and pulling. The large touch screen features an uncluttered menu with high color contrast and large font size.

Accessibility

Is your fitness area ADA compliant?

SCIFIT products offer complete accessibility including direct wheelchair access, low step over, swivel seats and assistive handrails and steps to meet the needs of all residents.

For Everyone

Need equipment to accommodate residents just beginning physical activity and also those who are athletic? SCIFIT offers the broadest user height range and workload range in the industry to accommodate residents of all sizes and abilities.

Not Much Space?

Get a complete total body cardio and strength workout with less than 100 square feet. A typical 3-piece pod includes an upper body exerciser, recumbent bike (lower body) and an elliptical (total body). SCIFIT pods can be customized to meet the needs of you and your residents. Have room for just one product? The PRO2 Total Body Exerciser is 3 products in 1: upper body, lower body or total body exercise.

Safety

From sturdy side handrails to low starting resistance, SCIFIT equipment has features integrated to keep individuals safe while staying physically active. In addition, the products have a built-in Iso-Strength program that provides safe resistance training without intimidating, cumbersome weights.

Invest in Durable Equipment

When it comes to selecting equipment, low cost in the short-term may not always save you money in the long run. Good quality equipment will ultimately be more reliable and make for a better resident experience. SCIFIT products are reliable, durable and are backed by a premium warranty, resulting in peace of mind and reduced cost of ownership.
